EnSoil Algae®

Made in USA

2025 EnSoil Algae® Dryland Corn Trial Conducted by Elevated Ag Systems in Eastern Virginia

Corn Stand Count

Trial Location:
Loretto, Virginia

CRO:
Elevated Ag

Trial Description:

The trial was performed as a complete randomized block design with a minimum of two replicate plots for each treatment. Each replicate plot consisted of four rows and was 10 ft long with 30 inch row spacing.

Application Description:

EnSoil Algae® was applied in-furrow at planting as a pop up application and also applied in a 2x2 starter band, both at a rate of 8 oz per acre.
