EnSoil Algae®

Made in USA

Vineyard Trial Design

Location: Suisun Valley, CA

Trial Treatments:

EnSoil Algae®

- EnSoil Algae® was applied as a foliar treatment on a routine basis
- Application rate: 8 ounces per acre.

Untreated Control

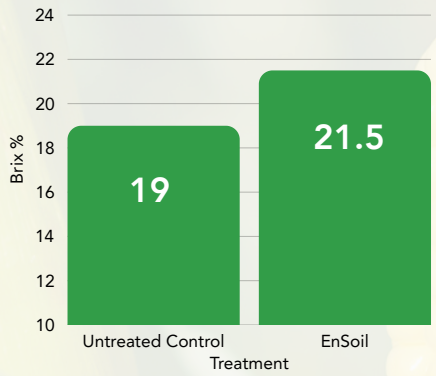

- This plot did not receive any EnSoil Algae® application and served as the untreated comparison baseline.

Goal: Evaluate the impact of EnSoil Algae® application on key grapevine tissue nutrient indicators with a plant sap test pair.

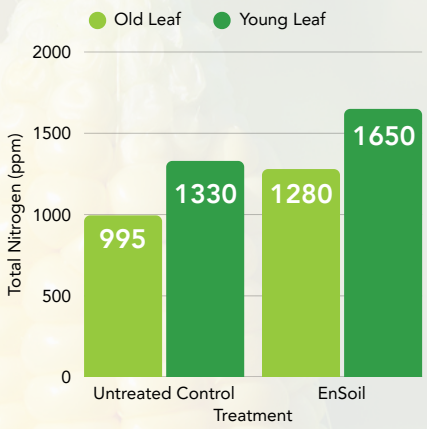

Nutrients that showed higher levels with EnSoil treatment:

- Brix (indicator of sugar)
- Total Nitrogen
- Potassium
- Magnesium
- Boron
- Iron
- Zinc

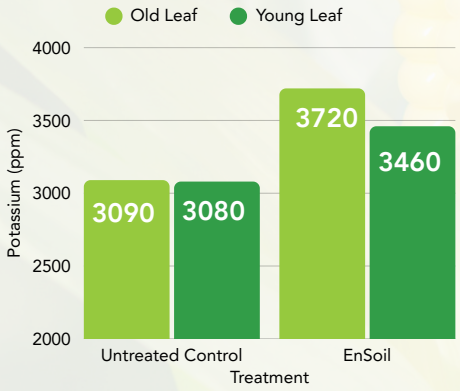

Young Leaf Brix Levels

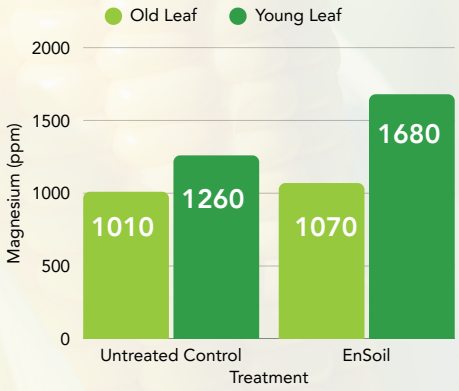

Total Nitrogen

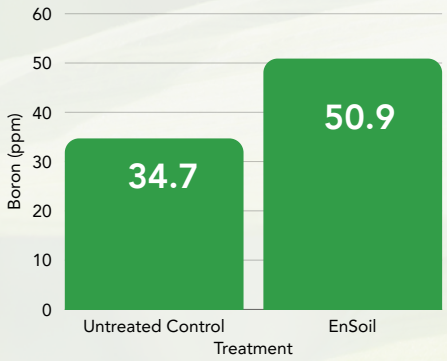

Potassium

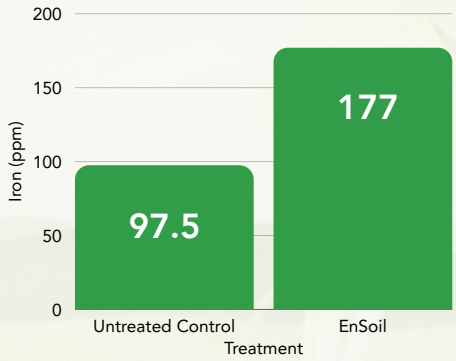

Magnesium

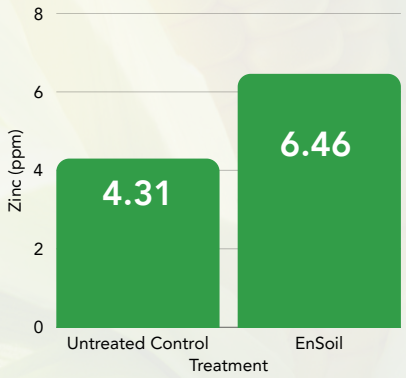

Boron in Young Leaves

Iron in Young Leaves

Zinc in Young Leaves
